

Barn solutions for sheep & goat

#milkplanners

Feeding belts

Animal feeding should take place in a comfortable environment and the amount of feed should be distributed equally and uniformly. MP Feeding Belt is the ideal solution for sheep & goat herds feeding due to its ergonomic and functional design.

It has reduced installation space needs and it allows speed adjustments according to the farmer's preferences. The farmer do not have to dispense feed along the barn and it provides secure locking per site.

Specs

TECHNICAL SPECIFICATIONS

1. Hot galvanized or stainless steel construction
2. Guillotine type without headlocks feeding belt
3. Inverter with digital display
4. Sizes from 10m to 100m

7. Protective covers of stainless steel or galvanized
8. 15cm neck opening for male and large sized animals

Automatic Lamb Feeders

An automatic feeder responds to the need of the young animals' early removal from their mothers without affecting their diet or extending the mothers' anestrus period. The automatic feeder you will find in our product range, facilitates significantly the farmer's daily work and ensures the young animals' healthy growth.

It offers fast feed preparation and heating, stirring and dosage configuration. It is easy to wash and simple to operate.

Specs

TECHNICAL SPECIFICATIONS

1. Digital Thermometer
2. Screen display and keyboard for easy settings adjustment
3. 8 feeding outlets
4. 35 kg powder container
5. Power supply: 2.8 kW (240V)/ 3.2 kW (230V)/ 5.0 kW (400V)
